

We have three cats that we love dearly and prior to being referred to Hannah our only choice was to use catteries when we go away which is quite often due to work commitments.

After the catteries they were always stressed, thinner and on one occasion extremely sick and needed emergency vet treatment for a long period of time. Going away became very stressful.

Hannah and her girls came into our lives and it is beyond words how wonderful this has been for us and our pets. We have had a number of Hannah's girls come and house sit for us for both long and short periods of time and when we come home the cats are happy, calm and almost aren't happy to see us they've been so pampered!

Steph has looked after us for the last few months and I cannot speak highly enough of her, the cats love her and so do we. Hannah and Steph have a personal service beyond anything we've experienced, we can go away knowing that our pets are safe and they message us whilst we're away so we know everything is ok, we even get photos sent through!

Add to all of this the fact that they ask you to contact them when you arrive home to make sure you get back safely and someone is there to care for the animals is great. One of our concerns is that if something happens to us and we don't make it back the cats would be left to fend for themselves – with Hannah's service we know that if we don't make it back that Hannah and her girls will continue to look after them until something is arranged.

If you have a pet of any sort that you need care for, please call Poppins Pet Sitters, you'll never look back and your pets will love you for it!
